

Dear Sir,

I have subscribed to XM radio for nearly two years. As a professional Interstate Truck Driver, I have enjoyed the news and weather reports that keep me informed. Recently, XM added traffic and weather conditions that update every 20 minutes for major metropolitan areas. This information has proven to be extremely valuable to me. Miles from my entering the region, I can re-route around major accidents, or long backups due to heavy volume, or construction. Time in the LTL industry is money. And, servicing Americas' business and commerce is crucial to the economic recovery.

We have been informed that you are being lobbied by big money radio owners to cancel this safety information. Please don't! Please let XM Radio serve it's paying customers.

Thank you,

Paul E. Evans
